

Job Description: Software Engineer

Company Profile

Company Name: TechNova Solutions

TechNova Solutions is a fast-growing technology firm specializing in cloud infrastructure, modern enterprise software architectures, and automated intelligence products.

Position & Package Details

Job Role: Software Engineer

Package (CTC): 12 LPA (Lakhs Per Annum)

Minimum CGPA Criteria: 7.5

Eligible Streams / Branches: Computer Science & Engineering (CSE), Information Science & Engineering (ISE), Electronics & Communication Engineering (ECE)

Key Responsibilities

- Design, develop, test, and deploy robust and scalable software solutions.
- Collaborate closely with cross-functional product and infrastructure design teams.
- Maintain high standards of code hygiene through continuous profiling, standard tracking, and peer reviews.
- Resolve application anomalies and optimize query processing flows in production databases.

Technical Skills & Requirements

- Strong foundation in core engineering principles, Data Structures, and Algorithms (DSA).
- Hands-on programming proficiency with languages such as Java, Python, JavaScript, or C++.
- Direct understanding of relational systems (SQL) or NoSQL databases.
- Familiarity with containerized environments, cloud microservices, or full-stack web applications is highly advantageous.
