EDUCATION

Canara Engineering College <i>Bachelor of Engineering in Computer Science (CGPA:8.0)</i>	Mangaluru, India 2023 – 2027
Sai Niketan PU College <i>Pre-University Course, PCMB (79%)</i>	Jamakhandi, India 2021 – 2023
S M kaluti Composite Sports Residential School <i>STATE Board (93%)</i>	Belagavi, India 2021

TECHNICAL SKILLS

Languages: Python, C, SQL
Frontend: HTML, CSS, Javascript
Tools and Frameworks: Jupyter Notebook, VS Code

PROJECTS

AI-DRIVEN WASTE SEGREGATION SYSTEM FOR SMART RECYCLING | HTML, CSS, JavaScript, Node.js, Express.js, Flask, TensorFlow, MongoDB, Google Maps API

- Developed an AI-powered web application for real-time waste classification and smart recycling recommendations.
- Built an AI-based waste segregation system using TensorFlow, Flask, and Google Maps API for smart recycling. Jan 2026
- Designed a smart waste management system that classifies waste and recommends nearby recycling centers.
- Implemented an AI-driven waste classification platform with 95% accuracy using TensorFlow and Flask.
- Developed a full-stack AI application for automated waste detection and recycling center recommendations.

ContribHub – AI-Powered GitHub Issue Analyzer | Python, Flask, GitHub REST API, Gemini AI, SQLite Oct 2025

- Developed an AI-powered GitHub issue analyzer using Flask and Gemini AI to classify repository issues and generate actionable solutions.
- Built a web application that analyzes GitHub repository issues and provides AI-generated action plans using Gemini AI.
- Created a GitHub repository issue analyzer using Python, Flask, and Gemini AI to simplify open-source issue resolution.
- Designed an AI-based GitHub issue analysis tool that categorizes issues and suggests resolution steps using the GitHub API and Gemini AI.
- Built a Flask-based application that fetches GitHub issues, classifies them, and generates AI-powered recommendations.

PARTICIPATION

- **Hackathon Participant:** Competed in a 24-hour hackathon, gaining hands-on experience in collaborative problem-solving and rapid prototyping.

COURSES AND CERTIFICATES

- **CodeWithHarry – Data Science Certification:** Completed a Data Science certification focused on Python programming, statistical analysis, and practical data-driven problem solving.
- **Infosys Springboard:** Earned a certificate for mastering the fundamentals of Python programming.
